excellence in every roof**

About us

Accurate Roofing is a multi-discipline roofing contractor specialising in the design, supply, and installation of a wide range of high-performance roofing systems.

Our expertise covers:

- Built-up Bitumen Felt Roofing
- Single Ply Membrane Systems
- Hot Melt Roofing
- Mastic Asphalt Roofing
- Green, Blue, and Biodiverse Roofing Systems
- Lead, Copper, and Hard Metal Roofing
- Traditional Slating & Tiling
- Liquid Waterproofing
- Fallarrest
- Solar Panels
- Slabbing
- Decking
- Aluminium Cappings/Coverflashings/
Rain Water Goods
- Lightning Protection

With a commitment to quality, safety, and sustainability, Accurate Roofing delivers reliable roofing solutions across commercial, residential, and public sector projects – ensuring performance, durability, and excellence on every installation.

Our History

Accurate Roofing was formed in 1985 by our Managing Director, as a small family business.

The business has grown steadily over the last 40 years and developed into the major roofing contractor we are today, working with many local authorities, main contractors, Prestigious clients, NHS & Government buildings.

We are conveniently based in Gravesend, Kent, with good access to major motorways, and rail links to London & beyond. We cover Kent, Essex, West & East Sussex, Hampshire, Berkshire, Buckinghamshire, London, Hertfordshire, Oxfordshire, Bedfordshire, Suffolk and Cambridgeshire.

Our office & warehouse facilities in Kent

EHS Commitment

We all have a duty of care to look after ourselves and those working with us, which is why we approach Environment, Safety, & Health through personal commitment and individual empowerment as everyone has a right to go home safe every day.

Each individual has a key part to play in keeping our workplaces safe and one of the most effective ways we can do this is by being aware of the risks around us and taking necessary and immediate action.

We actively encourage a culture of care and mutual respect by maintaining good relationships with all levels of our team

Health & Safety Ethos

Our robust H&S Management system is accessible to all employees on our projects, and we have a comprehensive reporting and monitoring system in place. Accurate Roofing employs a full-time qualified Health and Safety Manager to monitor performance, carry out unannounced safety visits, and report on overall performance to the board of directors.

To attain the high standards expected by our clients we have membership to various safety schemes in procurement as follows:

- **CHAS Elite Membership Number 0018006**
- **Constructionline Gold, Acclaim, & Builders Profile Under Membership Number 94822**
- **Safe Contractor Membership Number RR4642**
- **We are also members of the National Federation of Roofing Contractors Membership NO 1004, and the NFRC Roofing Competent Person Scheme, Membership Number 10921.**
- **We have also received the NFRC Gold Award for promoting high health, safety, and environmental standards consistently from 2016 to date.**

We are NFRC Accredited

Quality Control

All operatives are developed by seasoned roofers who possess the knowledge and the skills to carry out the works to a high standard but are also able to train less experienced operatives in best practice and British standards.

Supervisors will have attained an NVQ or SMSTS in their skill set, for example: Liquid applied waterproofing or built up felt roofing. The supervisor will also be an approved installer of the manufacturers product to ensure high standards are maintained. It is also vitally important that we ensure that supervisors running our jobs have good communication skills at all levels and can communicate with Stake Holders, Directors, Managers, and pass on concise information to all parties concerned as well as to colleagues and operatives under their supervision.

All clients are provided with a copy of Accurate Roofing's inspection & Test Plan, and it will be the responsibility of our Contracts manager and site - specific supervisor to ensure that the Inspection and Testing Plan is fully executed.

The Inspection and testing plan will be reinforced with area specific sign off sheets which shall document the step-by-step process of installation.

On built up felt, Hotmelt, Single Ply and Green Roofing Projects the Quality assurance process is subsequently underpinned with our material suppliers' technical representatives visiting our sites to carry out regular quality audits on the construction process for the projects they are guaranteeing.

This process confirms that our operatives are installing the materials in strict accordance with the works specification and to the high-quality workmanship standards that the manufacturer expects from their "approved installer" supply chain.

Accurate Roofing's ethos is to "fit once and fit right" meaning that our supervisors snag all works as the installation works are completed to ensure that there are no lengthy snagging lists at the end of the project, similarly our projects manager visually inspects the workmanship during the course of their weekly visits, as well as the technical representative from the manufacturer identifying any snags during their site inspections, any snags are dealt with in straight away to prevent future delays to program constraints.

**Fit once,
fit right!**

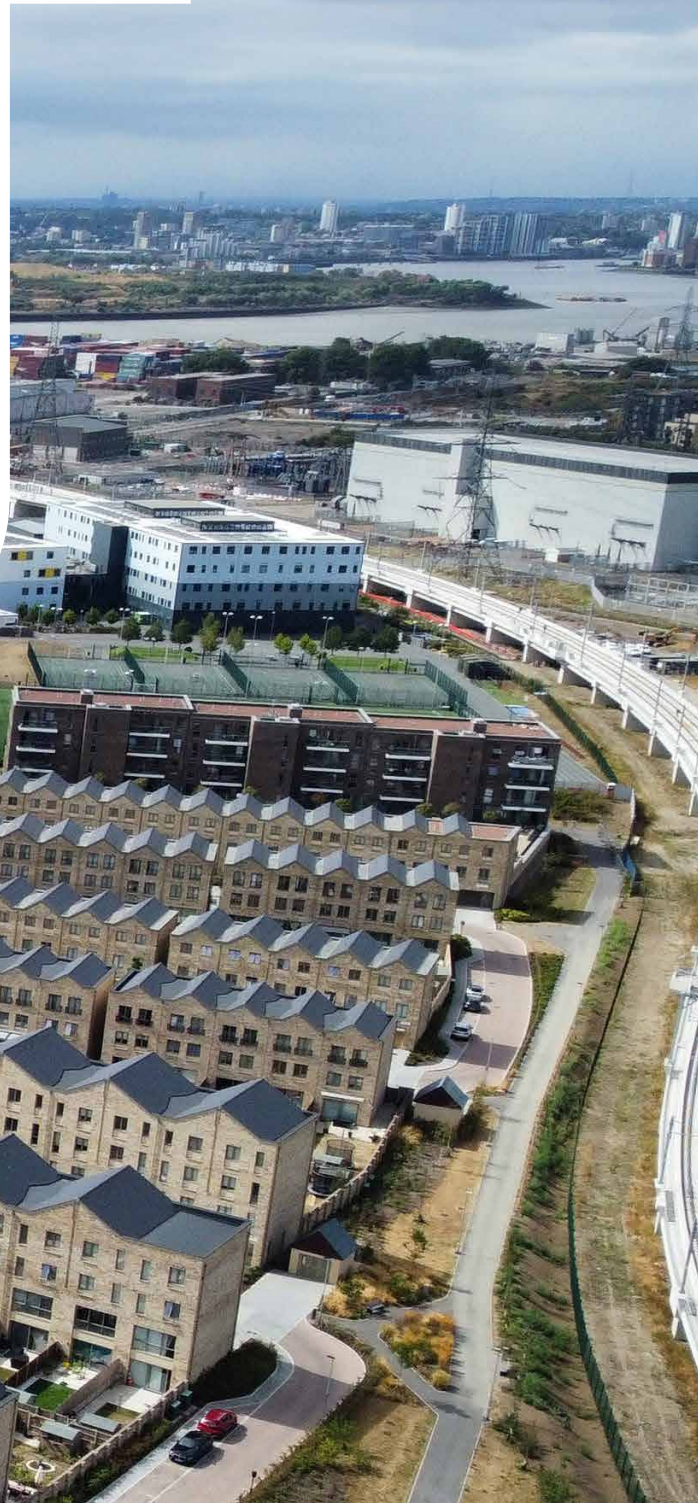

ISO Accreditations

Accurate Roofing are proud to announce that we have been awarded accreditation for ISO 9001, ISO 14001, and ISO 45001.

This achievement demonstrates our continued commitment to:

- Quality Management (ISO 9001)
- Environmental Responsibility (ISO 14001)
- Health & Safety Excellence (ISO 45001)

These accreditations reflect the high standards we work to across every project and our dedication to delivering safe, sustainable, and quality-driven roofing solutions for our clients.
